

SQ4R: An effective reading strategy

The **SQ4R** (**S**urvey, **Q**uestion, **R**ead, **R**ecite, **R**eview, **R**elate) method has been well-recognised as an effective approach to reading academic texts. It engages the reader during each phase of the reading process: **thinking before, during, and after reading**.

At first glance, the **SQ4R strategy** looks like a lot of work but if you persist and keep practising, you will have a very useful tool at your disposal; you will feel you have more control over your reading and you will get more out of the time you spend reading.

SQ4R at a glance
